No charge, but registration needed.

Learning Objectives:

By the end of the teleconference, participants will be able to:

1. Identify the different way food allergies are diagnosed.
2. State the cause of food allergies at the cellular level.
3. Identify ways to incorporate food elimination in the diet, but maintain a healthy diet.
4. Identify different treatment plans for families with children with food allergies.
5. State way to work with others in helping children with food allergies (e.g., schools).
